

Project Design Phase-II Data Flow Diagram & User Stories

Date	31 January 2025
Team ID	
Project Name	
Maximum Marks	4 Marks

Data Flow Diagrams:

This diagram maps how ticket information moves through the Service Now platform.

User Layer: Passenger submits "Ticket Request" via Service Portal.

Process Layer (Flow Designer):

- Trigger: Request submitted.
- Action: Validate input data against Metro database.
- Action: Process payment via Integration Hub.
- Action: Generate unique Ticket ID and QR string.

Storage Layer: Ticket details saved in u_metro_tickets table.

Output Layer: Email notification with QR image sent to passenger.

User Stories :

User stories define what each user type needs from the system. We can organize these in a table for your documentation.

ID	User Role	Requirement	Goal
US-01	Passenger	As a passenger, I want to book a ticket online	To avoid waiting in manual queues.
US-02	Passenger	As a passenger, I want to receive a digital QR code	To have a contactless entry experience.
US-03	Admin	As an admin, I want to track ticket sales	To monitor daily revenue and station traffic.
US-04	System	As a system, I want to validate payments	To ensure only paid tickets are generated.
