

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	31 January 2025
Team ID	
Project Name	
Maximum Marks	4 Marks

Functional Requirements :

#	Requirement	Description
1	Ticket Selection	The system shall provide options to select journey types (e.g., single, return).
2	Booking Process	The system shall enable users to initiate a QR ticket booking.
3	Visual Feedback	The system shall trigger a modal containing a QR code upon a successful selection.
4	Payment Integration	The system shall support multiple secure payment modes (e.g., UPI, card).
5	Status Tracking	The system shall allow users to view their current ticket or transaction status.

Non-Functional Requirements :

#	Requirement	Description
1	Response Time	The system shall display the QR code modal within 2 seconds of selection.
2	Data Security	All payment transactions must be encrypted using standard security protocols.
3	Availability	The system shall maintain 99.9% uptime to ensure service availability.

#	Requirement	Description
4	Accessibility	The user interface shall be responsive and usable across various mobile screen sizes.
5	Scalability	The system shall be capable of handling simultaneous booking requests during peak hours.
